F.Cu (scale 1:1)

The image shows a PCB layout for a board named 'F.Cu' at a scale of 1:1. The board is a dark red, irregular shape. It features a complex white circuit pattern in the upper left corner, including a microcontroller-like component with pins, several resistors, and connecting traces. Below this main circuit area, there are two pairs of circular pads, each pair connected by a vertical line, likely for a connector or test points. The board is oriented horizontally. The layout is presented within a grid with columns labeled 1 to 5 and rows labeled A to D. The title 'F.Cu (scale 1:1)' is located in the top right corner.

F.Cu (scale 1:1)

The image displays a PCB layout on a light gray background. A large, irregularly shaped red area represents the copper pour. Within this red area, there are white traces forming a circuit. At the top left of the red area, there's a complex set of traces connecting several rectangular pads. Below this, towards the center, there's a small square pad next to a circular pad. Further down, outside the main red area, there are two vertical pairs of circular pads, each pair connected by a thin vertical trace.

F.Cu (scale 1:1)

The PCB layout features a large red copper pour filling most of the board area. White traces define the circuit paths. Components include two integrated circuits at the top left, several surface-mount resistors (represented by small rectangles), and four through-hole pads arranged in a 2x2 grid at the bottom center. There are also three circular mounting holes: one at the top left, one at the top right, and one at the bottom right.
