F.Mask (scale 1:1)

The diagram shows a top-down view of a PCB layout. It includes several rectangular pads, some with internal patterns, and numerous circular vias or through-holes. The components are distributed across the board, with some clusters and others isolated.

F.Mask (scale 1:1)

The diagram shows a top-down view of a PCB mask layer. It features several components represented by standard symbols: four large circles at the corners (likely mounting holes), two horizontal rows of three rectangles each (resistors or capacitors), a vertical stack of three small squares (possibly vias or test points), and several other smaller geometric shapes scattered across the board. The entire assembly is contained within a rectangular frame.

B.Mask (scale 1:1)

The diagram shows a top-down view of a PCB layout. It includes several components represented by standard symbols: resistors (zigzag lines), capacitors (two parallel lines), integrated circuits (rectangles with pins), and other electronic components. The components are arranged on a grid. A large rectangular area in the center contains a cluster of components, including what appears to be a microcontroller or IC with many pins, surrounded by support components like resistors and capacitors. There are also some isolated components at the corners of the main assembly area.

	Project Name: Project name example	Drawn: Drw by	Notes: c1 c2 c3 c4

B.Mask (scale 1:1)

The diagram illustrates a PCB mask layout with components positioned as follows:

- Top Left:** One large circle component.
- Middle Left:** A vertical stack of three small square components.
- Middle Right:** Two large circle components.
- Center:** A cluster of components including two large circles, several small squares, and small dots.
- Bottom Center:** Two large circle components.
- Bottom Right:** One large circle component.
