F.Cu (scale 1:1)

The PCB layout features a large red copper pour filling most of the board area. White traces define the circuit paths. Components include two rectangular surface-mount components at the top left, several circular pads and vias throughout, and four through-hole pins arranged in a 2x2 grid at the bottom center.

F.Cu (scale 1:1)

The figure displays a PCB layout for a project named "F.Cu". The main area is a large red polygon representing the copper pour. White lines represent the traces. Various components are placed on the board, including a microcontroller or IC at the top left, several resistors (represented by small rectangles), and capacitors (represented by circles). There are also some unpopulated pads (circles) scattered around the board.

F.Cu (scale 1:1)

The image displays a PCB layout on a light gray background. A large, irregularly shaped area is filled with a solid dark red color, representing the copper pour. White lines represent the printed circuit board traces, forming a complex network. Several small circular symbols are scattered across the layout, likely representing vias or component footprints. In the upper left corner, there's a cluster of white rectangular shapes connected by traces, possibly representing integrated circuits or connectors. Below this, there are more traces and a few small circles. In the lower right, there's a small square symbol next to a circle. At the bottom center, there are two pairs of vertical lines, each pair consisting of two parallel lines, possibly representing test points or mounting holes.

F.Cu (scale 1:1)

The PCB layout features a dark red copper background. In the upper left, there is a dense arrangement of white traces forming a circuit pattern around several rectangular and circular pads. Below this, towards the center, is a single small square pad followed by a circular pad. At the bottom center, there are two identical vertical pairs of circular pads, each pair connected by a short vertical trace. Four small circles, likely registration marks, are positioned at the corners of the main layout area.

F.Cu (scale 1:1)

The image displays a PCB layout for a project named 'F.Cu' at a scale of 1:1. The layout is contained within a rectangular frame. It features a dark red, irregularly shaped copper pour area. Within this area, there are white traces representing the circuitry. A small square pad is located near the bottom center of the copper area. Below the copper area, there are two pairs of circular pads, one pair aligned horizontally and one pair aligned vertically. The layout is surrounded by a white background. The entire image is framed by a coordinate grid with letters A, B, C, D on the vertical axis and numbers 1, 2, 3, 4, 5 on the horizontal axis.
