In1.Cu (scale 1:1)

The diagram shows a top-down view of a printed circuit board (PCB) layout. It features several electronic components represented by standard symbols: two large electrolytic capacitors at the top left, a smaller capacitor or resistor at the top center, a microcontroller or IC package at the top right, and four surface-mount components arranged in a 2x2 grid at the bottom. These components are interconnected by a network of yellow conductive traces. The entire layout is contained within a rectangular frame.

In1.Cu (scale 1:1)

The diagram shows a top-down view of a printed circuit board (PCB) layout. It features several electronic components represented by standard symbols: resistors (zigzag lines), capacitors (two parallel lines), integrated circuits (rectangles with pins), and diodes (triangles pointing towards a bar). These components are interconnected by thin lines representing copper traces. The layout is contained within a rectangular frame.

In1.Cu (scale 1:1)

The drawing shows the following components:

- Three small yellow circles near the top-left corner.
- Two larger yellow circles near the bottom-right corner.
- A central cluster consisting of two horizontal pairs of medium-sized yellow circles.
- Yellow traces connecting some of the pads.
